

FABRIC + FINISHES GUIDE

INTRODUCTION

This guide is aimed at providing you with inspiration on how to cover and finish your custom made furniture. If you can't find exactly what you are looking for, give our sales team a call on 01246 264600 as we have an enormous amount of experience and a vast resource library to be able to find you exactly what you are looking for.

Other ways in which we work to bring your ideas to life include;

Customers Own Material (COM)

Already found the fabric or leather you love? We will upholster your furniture in your own material. All you need to do is ask us how much is required then send it in. Always remember, when supplying your own material, we need confirmation it meets the flammability requirement for contract furniture.

Customised Stain Finishes

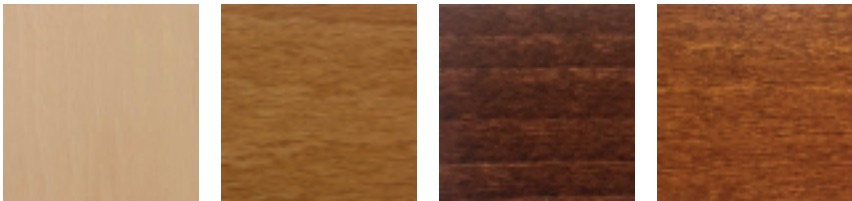

Do you have an existing piece of flooring or joinery with a colour you want to replicate? Send in a sample and we will colour match it for you. Please note, colour matching may incur an additional cost, subject to your requirement and quantity.

LAMINATES

ALL OPTIONS COME IN LAMINATE AND MFC WITH MATCHING EDGING AVAILABLE

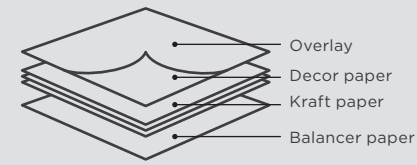

Our standard range is from Egger, a trusted supplier of high quality, great value laminate and melamine.

LAMINATES

Usage: Laminates are an ideal solution for furniture in mid-high traffic areas including table tops and other horizontal surfaces.

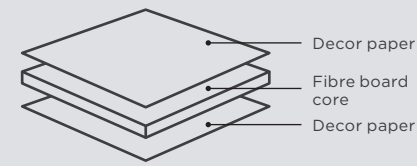

Technical: Decorative laminate has a thermosetting resin base, consisting of several pressed paper layers, with a melamine resin-impregnated decor sheet on the surface. Laminate sheets are then bonded to a substrate such as MDF to construct your furniture.

MFC (MELAMINE FACED CHIPBOARD)

Usage: MFC can be used for bedroom furniture carcasses, wall panelling and other low-medium traffic applications.

Technical: MFC is constructed from a pre-bonded decorative printed paper covering both sides of a particle board core. The surface texture of the panel (where applicable) is achieved during pressing with an engraved steel sheet.

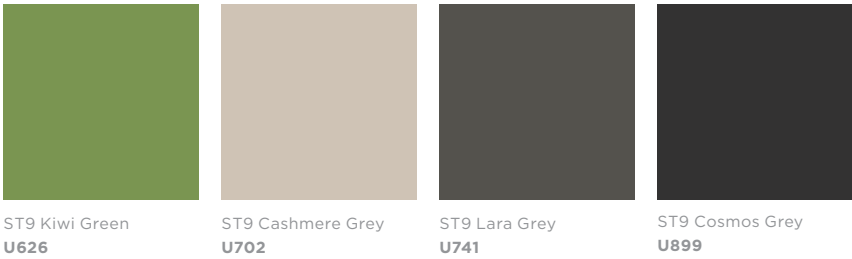

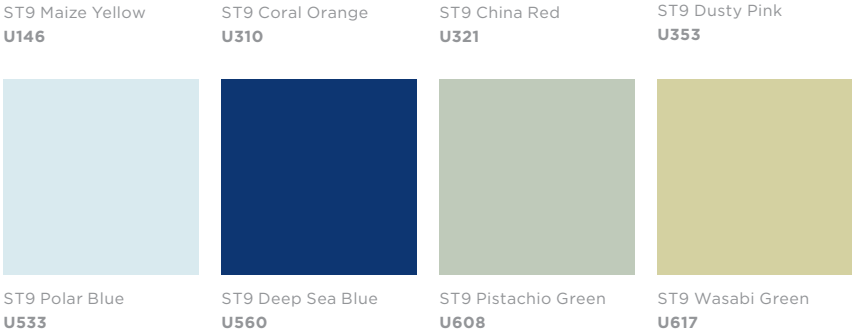

FEELWOOD

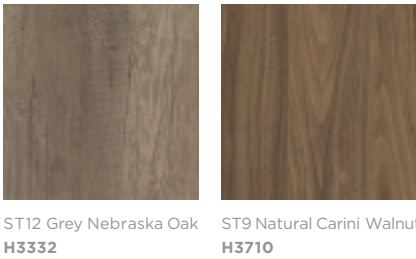

Some of the options available have a finish applied which gives them both the look and feel of wood. The ST28 texture is produced using synchronised pore technology where the texture and grain pattern align, whilst ST36 features a deeply brushed wood texture.

The images shown are a guide only. Please contact one of our sales team on **01246 264600** to request a tangible sample for approval.

LEATHER

Leather is a natural product and variations in colour and texture may occur. The samples provided are only offered as a guide. As a guide to ordering 1 linear metre of 138cm wide fabric is approximately equal to 1.7 square metres of leather.

The images shown are a guide only. Please contact one of our sales team on **01246 264600** to request a tangible sample for approval.

UPHOLSTERY FINISHES

NAILING

Our standard selection of nails come in strip form for a more cost-effective application, without compromising on quality. These are sized at 9.5mm diameter. Our N1 range is available from stock, with the N2 range available to order.

Remember, we are not limited to this selection and have access to a huge variety of nail sizes and finishes. Contact our team to explore the possibilities further.

GLIDES

Our products come with the G01 nylon glide as standard. This is suitable for carpeted floors. The G02 felt glide is often specified on wooden or hard surfaces. Please let our team know the floor on which your products will be sitting so we can incorporate the appropriate glide to protect your furniture and floor.

The images shown are a guide only. Please contact one of our sales team on **01246 264600** to request a tangible sample for approval.
