

# NOVA

YOUR SPACE: INFINITE POSSIBILITIES

## ROOM2 HOMETEL

**CLIENT:** Project Orange

**LOCATION:** Southampton

**YEAR:** 2018

### THE PROJECT

Room2 gives guests a place to live rather than simply stay and this month sees the launch of Room2 Southampton. Project Orange developed the existing Room2 bedroom design to suit the 1990's former office, taking advantage of the large floor to ceiling heights by creating a mezzanine level.

## THE FURNITURE

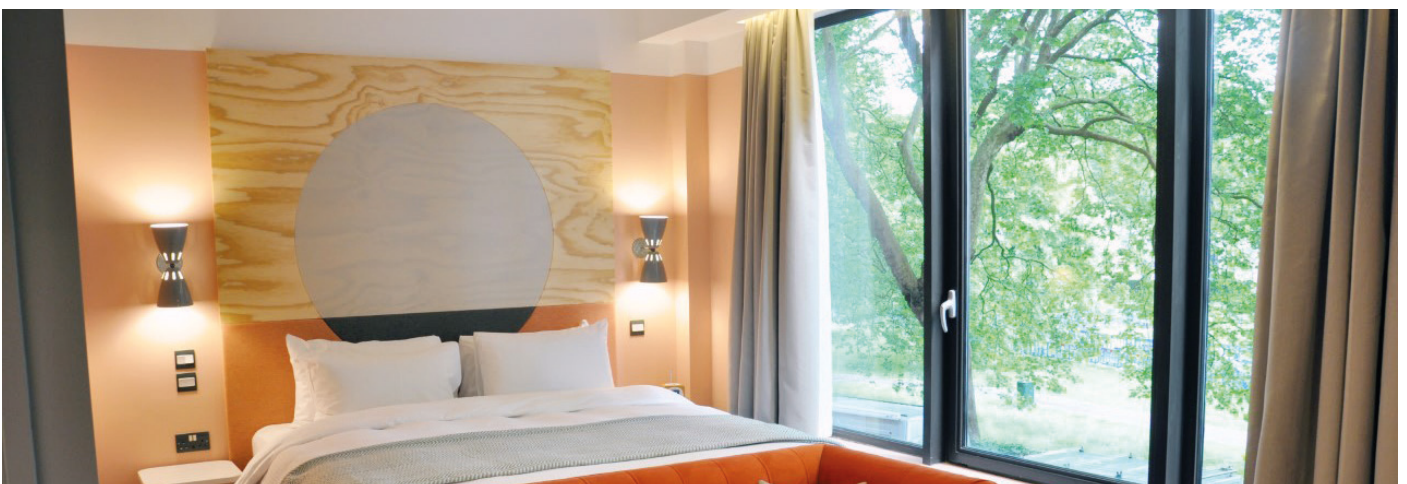

Room2 Southampton incorporates interior features which are not dissimilar to those found on board traditional cruise liners, a nod towards the importance of Southampton in cross-Atlantic travel. Nova Interiors was briefed by Project Orange to create the feature headboards for all 70 rooms, each comprising of an upper plywood section with dual tone finish, a clear lacquer and a white wash paint finish. The lower section of the headboard shows Nova's attention to detail and seamlessly continues the circular line through the upholstery.

## WHAT THE CLIENT SAID

"Nova provided an essential element of our overall room design and we were very pleased with the craftsmanship, attention to detail and final execution. Throughout the process Nova were a pleasure to work with and very flexible during a tight installation programme."

Alicia Newn / Marketing Executive / Room2 Hometels
